

Store	Likes	Dislikes
Steel Collectibles LLC.	• Can scroll and see all the feature options rather than click through filter settings. • Pictures of all the items makes it easier to know what I'm looking at/for. • Nice that prices are in different colors to make it easier to read. • Likes that everything is quick and easy to see on the front page • Likes being able to see the front and back of items. • Basic checkout system. Nothing great, nothing horrible.	• Items are too cluttered • Font color is hard to read because of background • Item listings are hard to see product • So many words on item listing • Payment options are nauseating • Distracting background. A lot to focus on. • Unclear buttons and misleading indicators for operation • Unclear what add note is for. Too much stuff at checkout and not intuitive at all. • Broken buttons that do similar features • No convenient checkout • Side filters feel redundant since everything is on front page. Doesn't know if they'll ever actually use the side bar since everything is accessible from the front. • Does not like the calculated shipping option. Wishes it did it automatically, finds it very inconvenient. Didn't even realize it was there. • Cannot search up specific comics, toys, etc. Filter system does not work with searches • NEEDS STRONG FILTERS FOR SEARCH BAR
Great Escape	• Pictures are nice. Background is clean. • In stock and out of stock options are helpful. • Notify automatically tags in the buy list. Don't need to click the specific item • Like the images • Prices are clear • Nice and clean, not nauseating to look at. • Layout feels more professional, like an actual store. • Task bar is pretty nice	• Most likely to just click Store rather than flip through subtabs. • All items should be sold together with the option to filter by type (comics, games, toys). • Filters are confusing when searching. There are two different filters, and neither are uniquely helpful. • Why have out of stock filter? Whats the use of looking for something specifically out of stock. Now need to go from not seeing it in stock, click the out of stock, and then type in contact me. Should be just a listing that says its stock, and provide the notification option if its not available. • No way to search specific comics (BIG

		ISSUE) • Searches are not geared towards specific selling item. • So many figures and toys that no specific search option is crazy. There's too many items to be forced to scroll through every single one in order to find a specific item. • Don't like that filters are from dropdown menu. • Store should be its own page with an integrated filter to shop for everything • When adding item to cart, don't like having to click out to continue buying. Or at least should be clear where to exit the checkout menu. • Have to manually change the purchase amount rather than being able to simply add another to your cart. • Shipping calculator is not useful. Just show me the shipping. • Doesn't save cart • NEEDS A SEARCH BAR
Syndicate Comics Collectibles	• Enjoy big buttons that change comic type. More convenient than having to go back to the task bar and flip between submenus • Like that the price is bigger than the words, much more clear. • Pictures are nice, but backgrounds are a little busy. • Back photos of comics could be helpful • Search is very help. Needs to be more apparent on the store page, not tucked away on the task bar. • Likes the comic info "add to cart" page • Very great added to cart screen. Plenty of signifiers where to exit, continue shopping, and see cart. Also drops down from cart icon so you know where to click later. • Nice clean, simple cart screen. Shows everything cleanly. • Like the payment options alongside	• Shop isn't immediately viewable since the comic types take up a big chunk of space. • Page snaps back to the top after clicking next page. Annoying to look through. • Filters are not helpful for regular people. Who know the exact price or brand of a specific comic? • No obvious search bar. • Would maybe like option to zoom in on comic from the purchase menu. • Quick add could be nice.

	the payment options in the cart menu. • Auto does the shipping cost. Very nice. • Saves our cart

Important Notes for Meeting 1:

- What is the current POS system they use? Does it include any security we need to maintain or expand upon?
- What hardware/software do they use?
- To clarify, are you wanting to now integrate a pull list system, or a complete online store front overhaul?
- Have them define their current problem, and functions they want improved.
- You mentioned you don't use pull lists, can you walk us through what you're picturing for customer orders instead?
- Their online store is currently down. Ask them how the current order of operations is currently. Ask them how they want their new system to function.

We are trying to identify technical issues, and clearly outline their current problem. As per the professor, DO NOT ASK QUESTIONS ABOUT DESIGN OR UX FEATURE, we will address these after we have an understanding of the current system, the sponsor's problem, and our own solution.
